

**REMARKS**

This application was originally filed on 15 September 2003 with four claims, one of which was written in independent form. No claims have been allowed. Claim 1 has been canceled, and Claims 16-27 added by this amendment. As there are now fifteen total claims, three of which are written in independent form, it is believed no fee is due as a result of this amendment. Nevertheless, please charge any required fees to the deposit account of Texas Instruments Incorporated, Deposit Account No. 20-0668.

The abstract of the disclosure was objected to as exceeding 150 words. The abstract has been amended to reduce its length to 132 words.

Claims 2-4 were objected to as being dependent upon a rejected base claim but were deemed allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. Claim 2, from which Claims 3 and 4 depend, has been rewritten to include the limitations of canceled independent Claim 1.

Newly added Claims 16-27 recite additional embodiments of the lens. Claim 16 recites "a first lens having an axis" and "a second lens on said axis." Claim 22 recites "a first lens on a projection light path axis" and "a second lens on said projection light path."

In view of the amendments and the remarks presented herewith, it is believed that the claims currently in the application accord with the requirements of 35 U.S.C. § 112 and are allowable over the prior art of record. Therefore, it is urged that the pending claims are in condition for allowance. Reconsideration of the present application is respectfully requested.

Respectfully submitted,

Charles A. Brill
